

# Lakshay Bansal

Software Engineer — ETL Developer — Backend & Data Engineering

Albany, NY | 518-229-0731 | lakshaybansal655@gmail.com

Portfolio | GitHub | LinkedIn

## EDUCATION

State University of New York at Albany

Jan 2024 – May 2026

Bachelor of Science in Computer Science, Cum Laude

Albany, NY

**Relevant Coursework:** Data Structures, Algorithms, Databases, Operating Systems, Computer Networks, Cryptography, Software Engineering

## PROFESSIONAL EXPERIENCE

LevrX Technology, Inc.

Apr 2026 – Present

ETL Developer, Full-Time

Jun 2026 – Present

ETL Developer Intern

Apr 2026 – May 2026

- Design and maintain ETL workflows supporting healthcare and pharmacy benefit management data.
- Build data-ingestion and transformation pipelines using SQL, Python, FME, AWS S3, and secure file transfer.
- Develop reusable FME transformers, preprocessors, loaders, and automated client-processing workflows.
- Validate healthcare datasets, troubleshoot production jobs, and improve processing reliability.
- Collaborate with engineers and analysts to deliver client integrations and backend automation.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, TypeScript, SQL, C/C++, HTML, CSS

**Frontend:** React, Next.js, React Native

**Backend:** FastAPI, Flask, Node.js, REST APIs

**Databases:** PostgreSQL, MySQL, MongoDB, Firebase, Supabase

**Data:** ETL, FME, Data Pipelines, Transformation, Validation, File Processing

**Engineering:**

**Cloud & DevOps:** AWS S3, Docker, Kubernetes, Git, GitHub, Vercel, CI/CD

**Tools:** JUnit, Postman, VS Code, IntelliJ IDEA, PyCharm, Jupyter

## PROJECTS

AI Photo Forensic Detector

Spring 2026

Python, FastAPI, PyTorch, Next.js, React Native

- Built an AI-powered forensic platform using metadata analysis and deep learning to identify manipulated images.
- Developed APIs for image and ZIP uploads, batch processing, and downloadable PDF and CSV reports.
- Integrated a 13-channel ResNet model to predict camera settings and generate authenticity verdicts.

Labourie — Labor Marketplace Platform

Sep 2025 – Nov 2025

Next.js, PostgreSQL, Auth.js, Stripe

- Developed a full-stack labor marketplace with authentication, job management, and secure payments.
- Integrated Stripe Connect for escrow payments, automated payouts, and platform fees.
- Designed REST APIs and optimized PostgreSQL schemas for transactions and reporting.

Package Assignment and Routing System

Spring 2026

Python, Graph Algorithms, Genetic Algorithm, Ant Colony Optimization

- Developed a capacity-aware vehicle-routing system using real-world Albany road-network data.
- Implemented Genetic Algorithm, Ant Colony Optimization, and Simulated Annealing solutions.
- Compared route cost and execution time through automated evaluation and visualizations.

Tran Language Compiler & Interpreter

Spring 2024

Java, Recursive-Descent Parsing, JUnit

- Built a custom programming language with a lexer, parser, abstract syntax tree, and interpreter.
- Implemented variables, functions, control flow, input/output, runtime validation, and unit testing.

## CERTIFICATIONS

Stanford University — Algorithms

Apr 2023

Stanford University — Introduction to Statistics

May 2023

IBM — Introduction to Artificial Intelligence

May 2023

IBM — Introduction to Hardware and Operating Systems

Apr 2023

Great Learning — SQL for Data Science

Sep 2022

## AWARDS & HONORS

Runner-Up, Best Computer Science Capstone Project

May 2026

Cum Laude, University at Albany

May 2026

2nd Place, AI2EM Competition

Apr 2024

Dean's List, University at Albany

Spring 2026
